

I am a subscriber to XM Radio mainly because I am an over-the-road truck driver. XM gives me the latest on weather and local traffic in most areas so I can avoid the congested spots and save time, money and possibly my life. When I am home I listen to several local radio stations because they pertain to the area where I live. When I am on the road I can not get local stations because I do not know where on the dial they are located. If I happen to get a good station, I can only listen to it for maybe 30 minutes before I'm out of range and have to start looking for another station. I have lost my First Admenment rights because I can not talk about anybody running for election so many days before an election. If XM Radio is shut down or barred from expanding their format to help the public because of anything the FCC and/or Congress does, I will make sure that I do not vote for anybody that is in office or has ever held that office before. Of course, I'm in full support of term limits for all political office holders anyway.
